Summary

A product designer who enjoys working on projects that make a difference. With over 3+ years of experience, in building high-quality interfaces and delivering exceptional design solutions.

Experience

Verizon March 2025 - Present
Experience Designer 2 (INTL)
Hyderabad, Telangana

<https://www.verizon.com/business/>

Currently building Verizon's rep facing POS system catering to enterprises looking for a sustainable ecosystem to equip their teams with technology and connectivity.

Parallel June 2022-June 2024
Product Designer
Bengaluru, India

<https://www.parallelhq.com/>

Have led and strategized design and growth of Urban Piper in tie with Parallel in a team of 4. From design strategy to design application, I have deployed over 4 features on the project. Led design execution of 3 projects from design explorations to launch. Worked cross-functionally with 3 different clients across 3 different teams.

I have worked on diverse design projects across multiple domains, leading and collaborating on AI, chatbot, and visual design implementations. At xto10x, I conducted user research and developed Figma prototypes for platform design. With Sarvam AI, I led Figma prototyping demos and explored AI design patterns. At Dell, I facilitated an AI design sprint for their rural non-communicable disease detection platform. For IndusInd x Hyperface, I created visual identities and a design system for their premium credit card PWA. I also contributed to Urban Piper's customer-facing onboarding flow and led design for Tamil Nadu's government dashboard systems at CEGIS.

iDesign.Market Dec 2021 - April 2022
Product Designer (Internship)
Gurgaon, India

<https://www.idesign.market/>

Built their ERP SaaS for Interior, Architecture and Construction firms from scratch with user research, multi-feature designs and design system essentials.
